

Bob;

Thank you for having a "fun and you are
(CLASS)"
here to learn environment in your class room.
It made it easy for someone like me with no
knowledge of fiber, connectors or fusion, core,
cladding, any terminology of the fiber industry
you made it easy and challenging to
me and joking at the mistakes we all
made made us learn more. Keep teaching
it helps people like me wanting to learn about
fiber. ~~for~~ I would like to do fiber now instead
of copper. Thank you I hope to see you
~~at~~ or you other teacher-notes in more classes soon.
